LUPP + PARTNER ADVISED 10X FOUNDERS IN CONNECTION WITH THE USD 1.2 BILLION SERIES D FINANCING ROUND OF QUANTUM SYSTEMS GMBH

The financing round, led by Blackstone and Airbus Defence and Space, marks a significant milestone for Quantum Systems and represents one of the most notable transactions in the European defence and dual-use technology sector. It underscores the increasing strategic relevance of innovative companies operating at the intersection of defence, security, aerial intelligence and advanced technology.

10x Founders is a founder-led investment platform backed by 300 entrepreneurs, supporting ambitious technology companies through capital, operational expertise and access to a strong network of founders and operators.

Quantum Systems is a German technology company active in the defence and deeptech space, developing autonomous, software-driven systems for use across air, land and maritime environments. Its platform approach enables unmanned solutions to operate seamlessly across different domains, supported by a proprietary software ecosystem designed for interoperability and scalable deployment. With operations and production capabilities in multiple international markets, Quantum Systems has established a strong position in the evolving European defence and security technology landscape.

Lupp + Partner's advice to 10x Founders further highlights the firm's expertise in advising on transactions involving high-growth technology businesses and strategically important sectors, including the defence sector.

Lupp + Partner is a transaction-focused law firm with more than 60 lawyers across offices in Munich, Hamburg, Frankfurt am Main, and Berlin. The firm focuses on advising private equity as well as venture capital investors, family offices, and business owners on M&A transactions.
